

# AUTOMATIC DEHYDRATORS

For gently preserving fruits, vegetables,  
herbs, mushrooms, meat, fish, ...  
Healthy & full of nutrients – 100 % natural

Whether for fruits, vegetables, herbs, meat or fish – with ROMMELSBACHER automatic dehydrators you will use the earliest form of preserving food - but in a modern way. The moisture is gently removed from the food. Vitamins, minerals and fibre however are largely preserved, the result is 100 % natural, without additives and preservatives. So you can easily and safely make your own homemade snacks which are both: tasty and healthy. There are a lot of possibilities: You can create fruit leather, vegetable chips, dried fruit, beef jerky, but also treats for animals or beautiful (Christmas) decorations. A uniform and constant drying process on all dehydration levels is ensured by an internal fan. A major advantage of these appliances, in order to allow for a variety of dehydration creations, is the temperature range adjustable from 35 – 75 °C with an additional 24 hour timer as well as an automatic switch-off function. Operation is very easy via Touch Control sensors with a clear LED display at the front. Thanks to the double-walled stainless steel housing of the dehydrator, excellent thermal insulation is given, which in turn keeps energy consumption very low. To get started right away, suitable accessories are included, like dehydration trays, grid and mats. No matter whether in regular size or XXL – both appliances are highly compatible with a consciously healthy diet!

*Great ranking in German consumer tests*

## Technical data:

- colour: stainless steel/black
- stable double-walled housing, made of stainless steel
- electronic control via Touch Control sensors
- LED-Display; 24 hour timer; automatic switch-off function with audible signal
- temperature adjustable from 35 °C to 75 °C; very quiet, even heat distribution on all dehydration levels
- electronic temperature control; overheat protection
- convenient lateral recessed grips; extra-long power cord (1.9 m); integrated cord storage
- 

Type: **DA 900** – 230 V ~ 600 W

- 6 sturdy dehydration shelves, stainless steel (30 x 31.5 cm)
- large dehydration surface 0.6 m<sup>2</sup>
- 1 dehydration grid and 1 dehydration mat (BPA free)
- dimensions: 45.6 x 34 x 31.5 cm

Type: **DA 1000** – 230 V ~ 1000 W

- 10 sturdy dehydration shelves, stainless steel (39.5 x 39.5 cm)
- extra-large XXL dehydration surface 1.6 m<sup>2</sup>
- 2 dehydration grids and 2 dehydration mats (BPA free)
- dimensions: 54 x 43 x 41.9 cm
