

QUALITY AND CONFORMITY DECLARATION
ACCORDING TO THE EUROPEAN NORM

Manufacturer	A.R.T. CERAM SRL
Trademark	A.R.T. CERAM SRL
Manufacture material	Fine fire-clay (a blend of clays, china clay, quartz and grog baked at 1250° C, having an absorption coefficient lower than 9%) Vitreous china (a blend of clays, china clay, quartz and feldspar baked at 1230° C, having an absorption coefficient lower than 0,5%)
Manufacture process	Dressing of wet ceramic body, shaping by slip casting, drying, glazing and baking
Operating features control	Resistance of the glazing to acids, alkali, cleansing agents, spots, abrasion and thermal shock etchings. Ceramic water absorption. Resistance to static loads
Guarantee	Replacement of the products for making faults within 2 years (1 year for accessories when tested that the defect has not been caused by a wrong use)
Maintenance and cleaning	For cleaning use tepid water and not abrasive cleansing agent made mainly of chlorine water; for calcareous matter removal use hydrochloric acid thinned with water
